

SchoolPass Visitor Management System

EXCITING NEWS!

Faith Academy has implemented a new visitor management system that will assist our school staff in keeping our students safe. This new system facilitates visitor screening, visitor badge printing, notifications, and emergency attendance – all in one place. Our school staff will know in real-time all visitors and students coming and going from your campus, increasing the safety of students, teachers and staff. Before any visitor will be allowed to enter the school building during the school day, they will be required to sign-in on the iPad that is located in the main office in building #4 OR EEC building #6.

All of our parents will be sent a Digital ID that can be used each time you sign into the school building during the school day (see picture to the right). This Digital ID can be saved on your Smartphone using the 'Wallet' app or in your photos so that it will be quick and easy to find when you arrive at the school to check in. To use this ID when signing into the school as a visitor, you will simply open it on your smart phone and scan the ID with the Visitor Management iPad. You will then need to answer a couple questions regarding the details of your visit to the school. It is very quick and easy!

Any visitor to our building that is not a parent will need to either scan their driver's license or manually enter all of their information on the visitor management iPad.

We are excited to begin using this new program, it will provide our school a quick and easy way for visitors to sign in to our campus and will also add another level of security to keep our kids safe.
